Professional Summary

Senior Full Stack Software Engineer with 8+ years of experience building production web applications, internal platforms, and digital asset systems. Strong expertise in React, TypeScript, Node.js, Go, GraphQL, microservices, and cloud environments. Hands-on experience in system design, software architecture, distributed systems, testing, and DevOps across fintech, blockchain, and media.

Technical Skills

Languages: Go, TypeScript, JavaScript, Python, SQL, Java

Frontend: React, Next.js, Electron, D3.js, HTML, CSS, LESS, jQuery

Backend: Node.js, Express, GraphQL, REST APIs, microservices, gRPC, JSON-RPC, Kafka

Testing: Unit Testing, Integration Testing, End-to-End Testing, Jest, Cypress, Playwright, Vitest

Databases: PostgreSQL, MySQL, MongoDB

Cloud / DevOps / Tools: AWS, Azure, AliCloud, Docker, Kubernetes, Terraform, CI/CD, monitoring and logging tools, Git, GitHub, GitLab, Bash, Linux

Professional Experience

Full Stack Software Engineer, Hex Trust

Hong Kong | Sep 2022 – Present

- Built and maintained production full-stack systems supporting digital asset operations using Go, Node.js, React, Java, Docker, Kafka, and microservices.
- Delivered backend services and frontend features for EVM-based asset flows, including deposits, withdrawals, staking, gas fee handling, and transaction processing.
- Contributed to system design, software architecture, and scalable distributed systems for wallet and digital asset platforms.
- Built internal authentication, administrative, and trading tools that improved access control, operational security, and workflow visibility.
- Supported reliable deployments and platform operations using Kubernetes, Terraform, CI/CD pipelines, and monitoring/logging tools.
- Expanded automated test coverage across platform components and services using unit, integration, and end-to-end tests with Playwright, Jest, and Vitest.
- Produced API documentation and CLI onboarding workflows to streamline client integrations and reduce support overhead.
- Mentored junior engineers through code reviews, debugging, and implementation guidance.

Blockchain Engineer / Full Stack Software Engineer, [Crypto.com](https://crypto.com)

Hong Kong | Mar 2022 – Jul 2022

- Contributed to the Chain DeFi desktop wallet using Electron, React, and Docker, supporting secure digital asset management workflows.
- Implemented internal cross-chain bridging functionality for Cronos and built internal blockchain tools to improve platform operations.

- Built real-time token price visualizations in D3.js for 250+ cryptocurrencies and contributed to a high-traffic platform built with TypeScript, GraphQL, and Node.js.
- Developed unit, integration, and end-to-end tests using Jest and Cypress.

Full Stack Software Engineer, AI Link Group Limited (TradeFi)

Hong Kong | Aug 2021 – Mar 2022

- Rebuilt the KYC system using Node.js, Express, MongoDB, and Docker, reducing verification time by 40%.
- Designed and launched an internal finance portal and RPA solutions that streamlined client application processing and reduced manual work.
- Redesigned database schemas to improve performance, maintainability, and scalability.
- Owned CI/CD pipeline improvements and developed unit and integration tests using Jest and Cypress.
- Mentored junior engineers through code reviews and implementation support.

Full Stack Software Engineer, South China Morning Post

Hong Kong | Jul 2018 – Jul 2021

- Created interactive editorial tools, infographics, and data visualizations using D3.js, JavaScript, jQuery, LoopBack.js, and Node.js for a high-traffic digital publishing platform.
- Built automation tools that reduced content production time by 70% for the infographics and design team.
- Launched a real-time COVID-19 tracker and reusable visualization templates to support high-traffic editorial coverage.
- Built backend APIs and data-processing workflows, and added unit tests for internal tools and newsroom applications.

Associate Systems Consultant, PolyAsia

Hong Kong | Jul 2017 – Jul 2018

- Delivered enterprise systems and infrastructure solutions across deployment and support projects.
- Customized Microsoft ERP solutions in C# for enterprise clients.
- Promoted within 3 months and led 2 developers on implementation projects.
- Managed Azure cloud deployments and infrastructure support for enterprise environments.

Education

City University of Hong Kong

Bachelor of Engineering in Information Engineering | Jul 2017
